骨粗鬆症の定番レファレンスの最新改訂第3版/全2巻

OSTEOPOROSIS

3rd Edition. 2-Volume Set

Edited by

Robert Marcus, Professor Emeritus, Stanford University, Palo Alto, CA, U.S.A.

David Feldman, Stanford University School of Medicine, Palo Alto, CA, U.S.A.

Dorothy A. Nelson, Wayne State University, Detroit, MI, U.S.A.

Clifford J. Rosen, St. Joseph Hospital, Bangor, Maine, U.S.A.

ISBN: 978-0-12-370544-0

装丁: Hardback

Pages: c.1,900

出版予定: 2007年10月

出版記念特価: \$320.00 (特価期限: 2008年1月31日)

定価: \$400.00 (2008年2月1日より)

10月
刊行

第一級の研究者の寄稿を仰ぎ、骨粗鬆症の最も包括的なレファレンスとして権威のある本書の最新改訂第3版。世界で60歳以上の女性2億人が苦しんでおり、常に医療における重大関心事たり続けている骨粗鬆症を、基礎的な解剖学、生理学から診断と治療に至るまですべての主題を網羅しています。学術・医学図書館、医師、研究者、企業研究機関等、骨粗鬆症に関連する関係者の方に必備の文献としてお薦めいたします。

〈前版からの改訂内容〉

- * Wnt シグナル経路の骨の健康への重要性に強く留意。
- * 骨細胞、phosphatonins, マウス遺伝学、中枢神経と骨の章を新たに追加。
- * Estrogen 抑制と治療に関する最新成果、WHI(Women's Health Initiative) からの最新情報を検証。
- * 医薬品登録の臨床試験とスクリーニングという議論を呼ぶ主題を論議。
- * カルシウム、ビタミン D、SERMS、bisphosphonates, 副甲状腺ホルモンの治療使用を最新成果を収載。

Contents

Introduction

The Bone Organ System: Form and Function
The Nature of Osteoporosis
The Economics of Osteoporosis
Reflections on Osteoporosis
Skeletal Heterogeneity and the Purposes of Bone Remodeling: Implications for the Understanding of Osteoporosis

Basic Science/Bone Biology

Osteoblast Biology
Osteoclast Biology
Osteocytes
The Regulatory Role of Matrix Proteins in Mineralization of Bone
Development of the Skeleton
Mouse Genetics as a Tool to Study Bone Development and Physiology
Parathyroid Hormone and Parathyroid Hormone-Related Protein
Vitamin D: Biology, Action, and Clinical Implications
Regulation of Bone Cell Function by Estrogens
Androgens and Skeletal Biology: Basic Mechanisms
Phosphatonins
Wnt Signaling in Bone
Cytokines and Bone Remodeling
Skeletal Growth Factors
Intercellular Communication During Bone Remodeling

Structural and Biomechanics

Skeletal Development: Mechanical Consequences of Growth, Aging and Disease
Inhibition of Osteoporosis by Biophysical Intervention
Biomechanics of Age-Related Fractures
Bone Quality

Epidemiology & Risk Factors

Epidemiologic Methods in Studies of Osteoporosis
Race, Ethnicity and Osteoporosis
The Study of Osteoporotic Fractures (SOF): Major Findings and Contributions
Bone Mineral Acquisition in Utero and During Infancy and Childhood
Bone Acquisition in Adolescence
Genetic Determinants of Osteoporosis
Nutrition and Risk for Osteoporosis
Physical Activity in Prevention of Osteoporosis and Associated Fractures
Premenopausal Reproductive and Hormonal Characteristics and the Risk for Osteoporosis
Non-Skeletal Risk Factors for Osteoporosis and Fractures
Falls as Risk Factors for Fracture
Assessment of Fracture Risk
Outcomes of Osteoporotic Fractures

Pathophysiology

Local and Systemic Factors in the Pathogenesis of Osteoporosis
Animal Models for Osteoporosis
Estrogen, Bone Homeostasis and Osteoporosis

Postmenopausal Osteoporosis: How the Hormonal Changes of Menopause Cause Osteoporosis in Men: Epidemiology, Pathophysiology, and Clinical Characterization
Osteoporosis in Childhood and Adolescence
Glucocorticoid-Induced Osteoporosis
Adult Scoliosis, Degenerative Disease, and BMD: a Sub-Segmental Analytic Approach
Mechanisms of Immobilization-induced Bone Loss
Leptin-Dependent Regulation of Bone Mass
Thyroid Hormone and the Skeleton
Osteoporosis in Gastrointestinal, Pancreatic, and Hepatic Disease
The Skeletal Actions of Parathyroid Hormone in Primary Hyperparathyroidism and in Osteoporosis
Osteogenesis Imperfecta and Other Defects of Bone Development as Occasional Causes of Adult Osteoporosis
Osteoporosis Associated with Illnesses and Medications
Transplantation Osteoporosis
Osteoporosis Associated with Cancer Therapy
Osteoporosis Associated with Pregnancy
Osteoporosis Associated with Rheumatologic Disease
Oral Bone Loss and Systemic Osteopenia: Potential Treatment and Risks
Localized Osteoporosis

Evaluation and Management

Evaluation of the Patient with Osteoporosis or at Risk for Osteoporosis
Who Should be Screened? Who Should be Treated?
Radiology of Osteoporosis
Clinical Use of Bone Densitometry
Biochemical Markers of Bone Turnover in Osteoporosis
The Conundrum of Compliance and Persistence with Oral Bisphosphonates for Postmenopausal Osteoporosis
An Orthopedic Perspective of Osteoporosis
Lessons from Bone Histomorphometry on the Mechanism of Action of Osteoporosis Drugs

Pharmacology and Therapeutics

Design Considerations for Clinical Investigations of Osteoporosis
Regulatory Considerations for the Design and Conduct of Osteoporosis Registration Trials
Evidence-Based Osteoporosis Care
The Role of Calcium in the Treatment of Osteoporosis
Vitamin D and its Metabolites and Analogs in the Management of Osteoporosis
Estrogen Therapy: Prevention and Treatment of Osteoporosis
Estrogen Analogues: Selective Estrogen Receptor Modulators (SERMs) and Phytoestrogens
Bisphosphonates: Pharmacology and Use in the Treatment of Osteoporosis
Calcitonin in Osteoporosis
Strontium Therapy for Osteoporosis
Androgens
Treatment with PTH Peptides
Growth Hormone and Insulin-like Growth Factors: Potential Applications and Limitations in the Management of Osteoporosis
New Approaches to Osteoporosis Therapeutics

2007-10-A
