パキノス&ワトソン監修

The Mouse Nervous System

Edited by

Charles Watson,

Professor of Health Sciences, Curtin University,
Perth and Senior Professorial Research Fellow
Prince of Wales Medical Research Institute, Sydney

George Paxinos,

Prince of Wales Medical Research Institute and
The University of New South Wales, Sydney, Australia

Luis Puelles,

Instituto de Neurociencias,
UMH-CSIC, San Juan, Alicante, Spain

冊子体

ISBN: 978-0-12-369497-3

定価:US\$249.95

約 800 頁

装丁: Hardcover

2011 年
11 月刊行予定
ご予約受付中!

Table of Contents

Section A - Development

Genetic regionalisation morphogenesis
Gene targeting
Genetic neuroanatomy

Section B - Structure

Neocortex
Hippocampus
Piriform cortex
Subpallial structures
Hypothalamus
Diencephalon
Midbrain
Cerebellum
Hindbrain
Spinal cord
Vascular supply
Imaging techniques

Section C - Motor and Sensory Systems

Motor nuclei of the cranial nerves
Visceral motoneurons

Neurosecretory nuclei of the hypothalamus and
preoptic area

Cortical structures in motor control
Hypothalamic goal directed behavior
Subpallial structures
Somatosensory
Gustatory
Pain
Auditory
Visual
Olfactory
Vestibular

Section D - Behavioral States

Basal nucleus of Meynert

Section E - Emotional States

Introduction to emotional states
Orbitofrontal cortex

Section F - Mouse Models of Mental Illness and Neurological Disease

Overview of mouse models
Huntington's
Drug addictions
