水科学論文集 全4巻

Treatise on Water Science 4-Volume Set

Edited by

Peter A. Wilderer

Technische Universität München, Institute for Advanced Study, Germany

2011年
4月
刊行

ISBN : 978-0-444-53193-3

装丁 : Hardcover

Page : Approx. 2,102

2011年4月刊行

出版記念特価 : US\$1,295.00 (出版後3ヶ月間有効)

出版記念定価 : US\$1,595.00

* 出版時期及び価格につきましては、予告なく変更となる場合がございます。
予めご了承ください。

水の品質とその管理に関する新しい参考文献です。世界的な人口増加や発展に伴い、水質および水量の確保は人類生存の最重要課題の一つとされています。本書では、水の自然科学的研究と応用、近年の革新的技術開発を中心に、水質管理の現状と新たな可能性の提言、法律、政策、経済効果など行政や産業的な側面まで幅広い関連項目を取り上げ、第一線で活躍する著者チームが執筆しています。科学的研究のみならず、安定供給体制の確立など、あらゆる角度から水研究に関わる多くの研究者必携の資料です。

Meet the Editors

Editor-in-Chief

Peter Wilderer, Technische Universitaet Muenchen, Institute for Advanced Study, Munich, Germany

Editors

Peter Rogers, Harvard School for Engineering and Applied Sciences, Cambridge, MA, USA

Stefan Uhlenbrook, Department of Water Engineering, UNESCO-IHE, Delft, The Netherlands

Fritz Frimmel, Karlsruhe Institute of Technology, Karlsruhe, Germany

Keisuke Hanaki, The University of Tokyo, Tokyo, Japan

Tom Vereijken, European Water Partnership, Grontmij, The Netherlands

TABLE OF CONTENTS

Volume 1: Management of Water Resources

Management of Water Resources
Integrated Water Resources Management
Governing Water: Institutions, Property Rights, and Sustainability
Managing Aquatic Ecosystems
Water as an Economic Good: Old and New Concepts and Implications for Analysis and Implementation
Providing Clean Water: Evidence from Randomized Evaluations
Pricing Water and Sanitation Services
Groundwater Management
Managing Agricultural Water
Implementation of Ambiguous Water-Quality Policies
Predicting Future Demands for Water
Risk Assessment, Risk Management, and Communication: Methods for Climate Variability and Change

Volume 2: The Science of Hydrology

The Science of Hydrology
Global Hydrology
Precipitation
Evaporation in the Global Hydrological Cycle
Interception
Infiltration and Unsaturated Zone
Mechanics of Groundwater Flow
The Hydrodynamics and Morphodynamics of Rivers
Lakes and Reservoirs
Tracer Hydrology
Hydrology and Ecology of River Systems
Hydrology and Biogeochemistry Linkages
Catchment Erosion, Sediment Delivery, and Sediment Quality
Field-Based Observation of Hydrological Processes
Observation of Hydrological Processes Using Remote Sensing
Hydrogeophysics
Hydrological Modeling
Uncertainty of Hydrological Predictions
Statistical Hydrology
Scaling and Regionalization in Hydrology
Stream-Groundwater Interactions

Volume 3: Aquatic Chemistry and Biology

Aquatic Chemistry and Biology
Sum Parameters: Potential and Limitations
Trace Metal(Ioid)s (As, Cd, Cu, Hg, Pb, PGE, Sb, and Zn) and Their Species
Sources, Risks, and Mitigation of Radioactivity in Water

Emerging Contaminants
Natural Colloids and Manufactured Nanoparticles in Aquatic and Terrestrial Systems
Sampling and Conservation
Measurement Quality in Water Analysis
Identification of Microorganisms Using the Ribosomal RNA Approach and Fluorescence In Situ Hybridization
Bioassays for Estrogenic and Androgenic Effects of Water Constituents
Online Monitoring Sensors
Standardized Methods for Water-Quality Assessment
Waterborne Parasitic Diseases: Hydrology, Regional Development, and Control
Bioremediation: Plasmid-Mediated Bioaugmentation of Microbial Communities – Experience from Laboratory-Scale Bioreactors
Drinking Water Toxicology in Its Regulatory Framework
Characterization Tools for Differentiating Natural Organic Matter from Effluent Organic Matter
Chemical Basis for Water Technology

Volume 4: Water-Quality Engineering

Water-Quality Engineering
Water and Wastewater Management Technologies in the Ancient Greek and Roman Civilizations
Membrane Filtration in Water and Wastewater Treatment
Wastewater Reclamation and Reuse System
Seawater Use and Desalination Technology
Abstraction of Atmospheric Humidity
Safe Sanitation in Low Economic Development Areas
Source Separation and Decentralization
Modeling of Biological Systems
Urban Nonpoint Source Pollution Focusing on Micropollutants and Pathogens
Constructed Wetlands and Waste Stabilization Ponds
Membrane Technology for Water: Microfiltration, Ultrafiltration, Nanofiltration, and Reverse Osmosis
Wastewater as a Source of Energy, Nutrients, and Service Water
Advanced Oxidation Processes
Biological Nutrient Removal
Biofilms in Water and Wastewater Treatment
Membrane Biological Reactors
Anaerobic Processes
Microbial Fuel Cells
Water in the Pulp and Paper Industry
Water in the Textile Industry
Water Availability and Its Use in Agriculture
